

Ignite

Supplied by **InStyle**
TIMBER PRODUCTS

Ignite supplied by InStyle is setting the cladding world on fire.

Japanese woodworkers discovered long ago that they could prolong the life of wood by charring the exposed surface. This process, called shou sugi ban, created enviable, stunning results that are still highly in demand today.

Traditional shou sugi ban is beautiful, but using it can be problematic. Most shou sugi ban leaves only the charred surface resistant to rot. Ignite provides the look of shou sugi ban, with durability all the way to the core. Unlike charred wood, Ignite has no messy residue.

Ignite supplied by InStyle offers the realistic look of charred wood, without the flames.

Ignite supplied by InStyle mimics the traditional look of shou sugi ban with the added benefits of thermal modification.

- ▶ Stained, brushed and embossed to recreate the texture of charred wood without the mess and residue
- ▶ Thermally modified to create consistent rot resistance to the core
- ▶ High level of dimensional stability
- ▶ Highly controlled process ensures reliable results every time

132 x 20mm Profile C24 Ignite
with 5mm Shadowline

ANCIENT TRADITION,
MODERN PERFORMANCE.
