

END GRAIN SEALER

Teknos Teknoseal 4000

Bayswood Timber recommends the use of Teknos Teknoseal 4000 end grain sealer for all external timber applications such as such as cladding, decking, posts and joinery, to protect against the risk of ingress of moisture to exposed timber ends.

USES

- A clear end grain sealer for timber components
- Suitable for hardwood and softwoods
- Timber should be clean and free from wood dust, deterioration and contamination prior to sealing
- Apply with brush or with a filling knife

BENEFITS

- Inhibits moisture ingress into timber end grain
- Excellent filling and blocking properties
- Can be over coated by a wide range of topcoats
- A water borne acrylic end grain sealer
